

Docubit (\$DBIT) Token Sale

Docubit (\$DBIT) is the Solana-based utility token powering DocSafe's Web3AI document stack that includes AI contract drafting, decentralized Web3 file storage, blockchain based e-signatures and on-chain auditing.

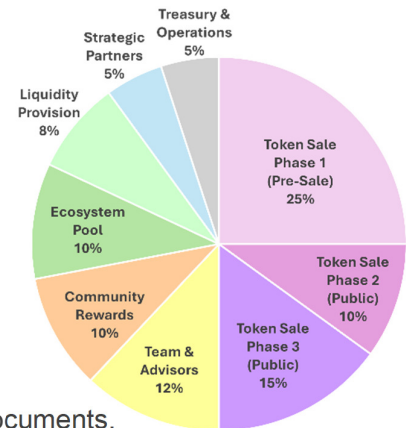

Real app products → Real pay-to-use utility → Regular app usage drives deflationary tokenomics.

Key Investor Points

- **Utility from Day 1:** Token used for AI credits, Web3 storage, e-sign/audits and workflow usage.
- **Clear Demand Loops:** App usage → DBIT spend → portion of token usage gets burned + staking.
- **Timed Catalysts:** AI app beta is live Nov '25; Web3 integrations follow; CEX/DEX listings Q1 '26.
- **Fair Structure:** Fixed 1B supply; phased pricing; transparent allocation; fiat + crypto accepted.

Token Sale At-A-Glance

- **Supply:** 1,000,000,000 DBIT (target 50% sold across 3 phases).
- **Price Bands:** **\$0.005–\$0.008** (bands vary by phase & volume).
- **Project Listing Price:** **\$0.009 - \$0.01** (for \$10M total Market Cap).
- **Vesting:** **None for Phase 1 < \$10k** (3-12 months vest for P2 / P3).
- **Payments:** Fiat USD (Card/PayPal) or Crypto (SOL/USDC/USDT).

DocSafe Product Utility using DBIT

- **DocSafe AI:** Generate / share / review / edit / sign / manage legal documents.
- **VaultX:** Decentralized, multi-cloud Web3 pay-per-GB storage API with low-latency.
- **ScanX:** E-signatures + immutable audit logging API recorded on the blockchain.
- **Nexus:** Integrated, modular, Web3AI platform for team workflows, automations and API usage.

Token Value Drivers

- **Direct demand:** Every AI document, GB stored, signature and audit consumes DBIT.
- **Deflationary mechanics:** Portion of DBIT chain-function spend burned on regular schedule.
- **Staking:** Aligns long-term holders with platform growth and value.
- **Network effects:** More teams / docs → more DBIT throughput → Stronger burn / lock dynamics.

Experienced Team: Over 30+ years of combined Web3 / AI / Blockchain experience with multiple ICOs.

How to Buy
