Governance

Missing Liquidity

Token liquidity (pairs) not found.

High Risk

Recently Deployed Contract

The smart contract was deployed less than 14 days ago.

Attention Required

Mutable Metadata

The token's metadata is mutable and can be updated by the update authority.

Attention Required

Verified source code found

No mintable risks found

Users can always transfer their tokens

Contract cannot be upgraded

Wallets cannot be blacklisted from transferring the token

No transfer fees found

No transfer limits found

No centralized balance controls found

No transfer cooldown times found 

No external calls detected

No previous scams by owner's wallet found

✓ No transfer limits found

✓ No centralized balance controls found

✓ No transfer cooldown times found [P](#)

✓ No external calls detected

✓ No previous scams by owner's wallet found

✓ **Recent Interaction was within 30 Days**
Smart contract with recent user interactions, active use,
and operational functionality, not abandoned

✓ Securely hardcoded Uniswap router ensuring protection against router alterations

✓ Fully Transferable Token

✓ Token with Complete Metadata

✓ No significant liquidity rugpull risk found
